

Robots and AI Methods in Education

Jürgen Handke

3M-Solutions/Philipps-Universität Marburg

2019

1. Humanoid Robots
2. The Role of AI/Robots in Education
3. Teaching and Learning
4. Educational Robot Applications

1. Humanoid Robots

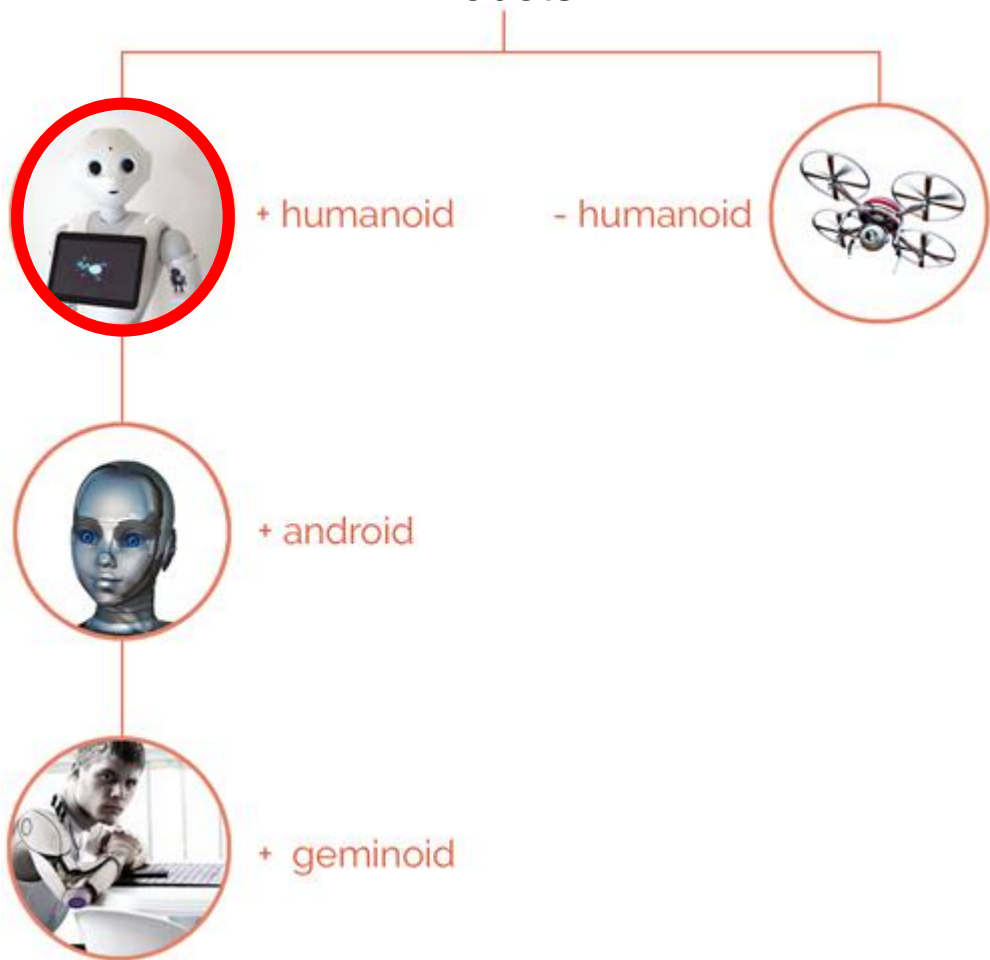

What are humanoid robots?

Robots: The State of the Art

Robots

[+ humanoid, - android]

Humanoid Robots

+ humanoid
- android
+ small

... perhaps too small to be taken seriously ... ?

Alpha 2

Darwin Mini

Pillow

DARwin-OP

Prof. Einstein

Nao

Humanoid Robots

- + humanoid
- android
- **small**

*Tall enough to be taken seriously ...
but still small enough to be
considered inferior to humans ?*

Poppy

Pepper

Asimo

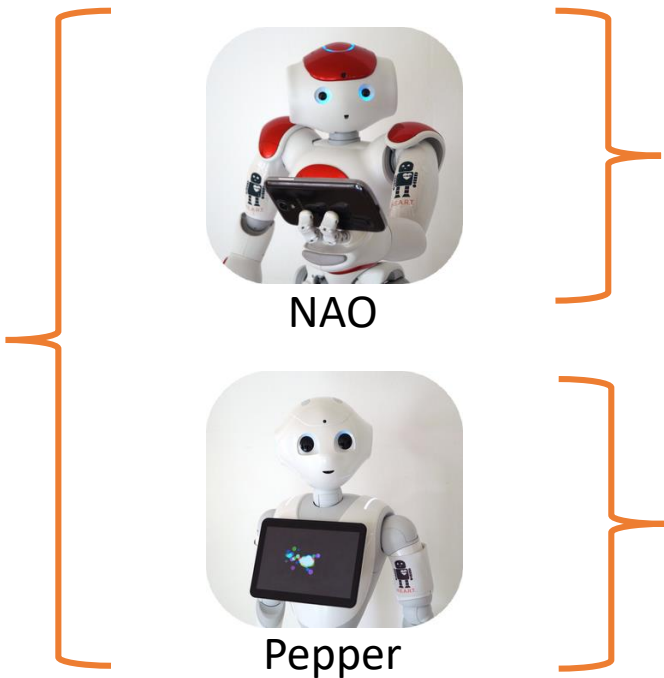

Surena III

Humanoid Robots

General features

- Speech (AmE/Ger)
- Movement
- Awareness
- Object Recognition
- Emotions
- Media Integration
- Internet Access

Special features

- Height: 58 cm
 - Movement: Legs
 - Activation: Triggers
 - Primary Role: Tool
-
- Height: 120 cm
 - Movement: Wheels
 - Tablet
 - Activation: Triggers/Tablet
 - Primary Role: Partner

+ customized Robot Apps

2. The Role of AI/Robots in Education

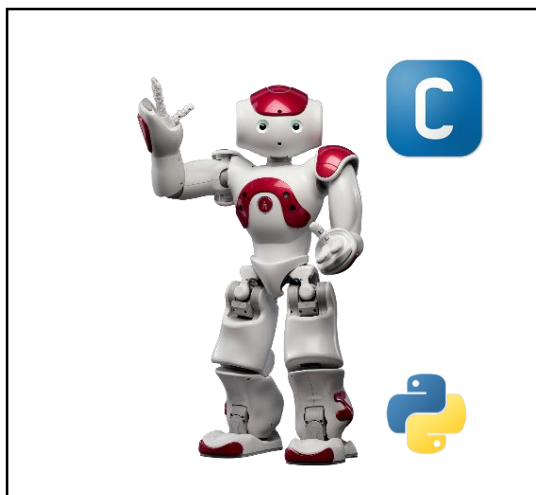

What are the central functions of humanoid robots in education?

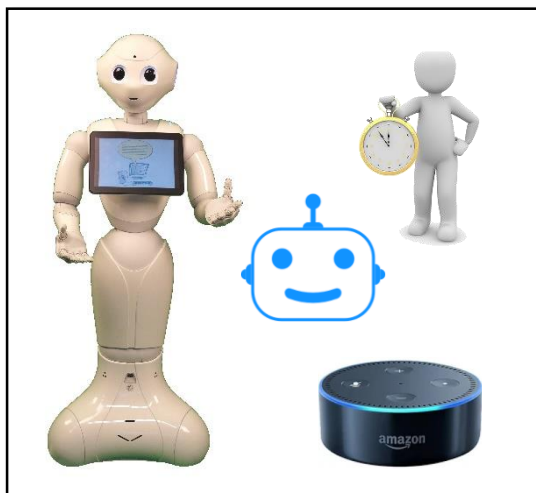

Options

The Tool Function

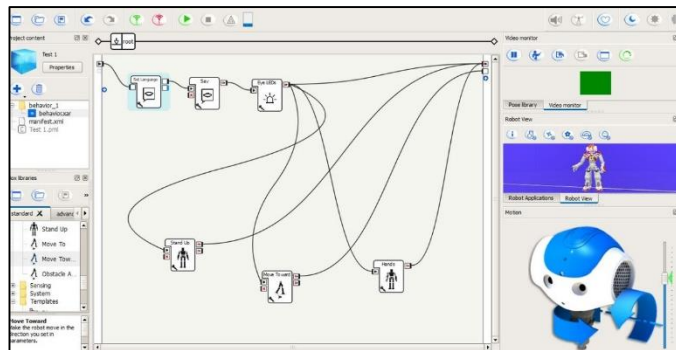

The Partner Function

Robots as Tools

Educational Robotics

```
def onInput_onSet(self):
    lang = self.getParameter("Language")
```

1a: Mastery Learning

Online

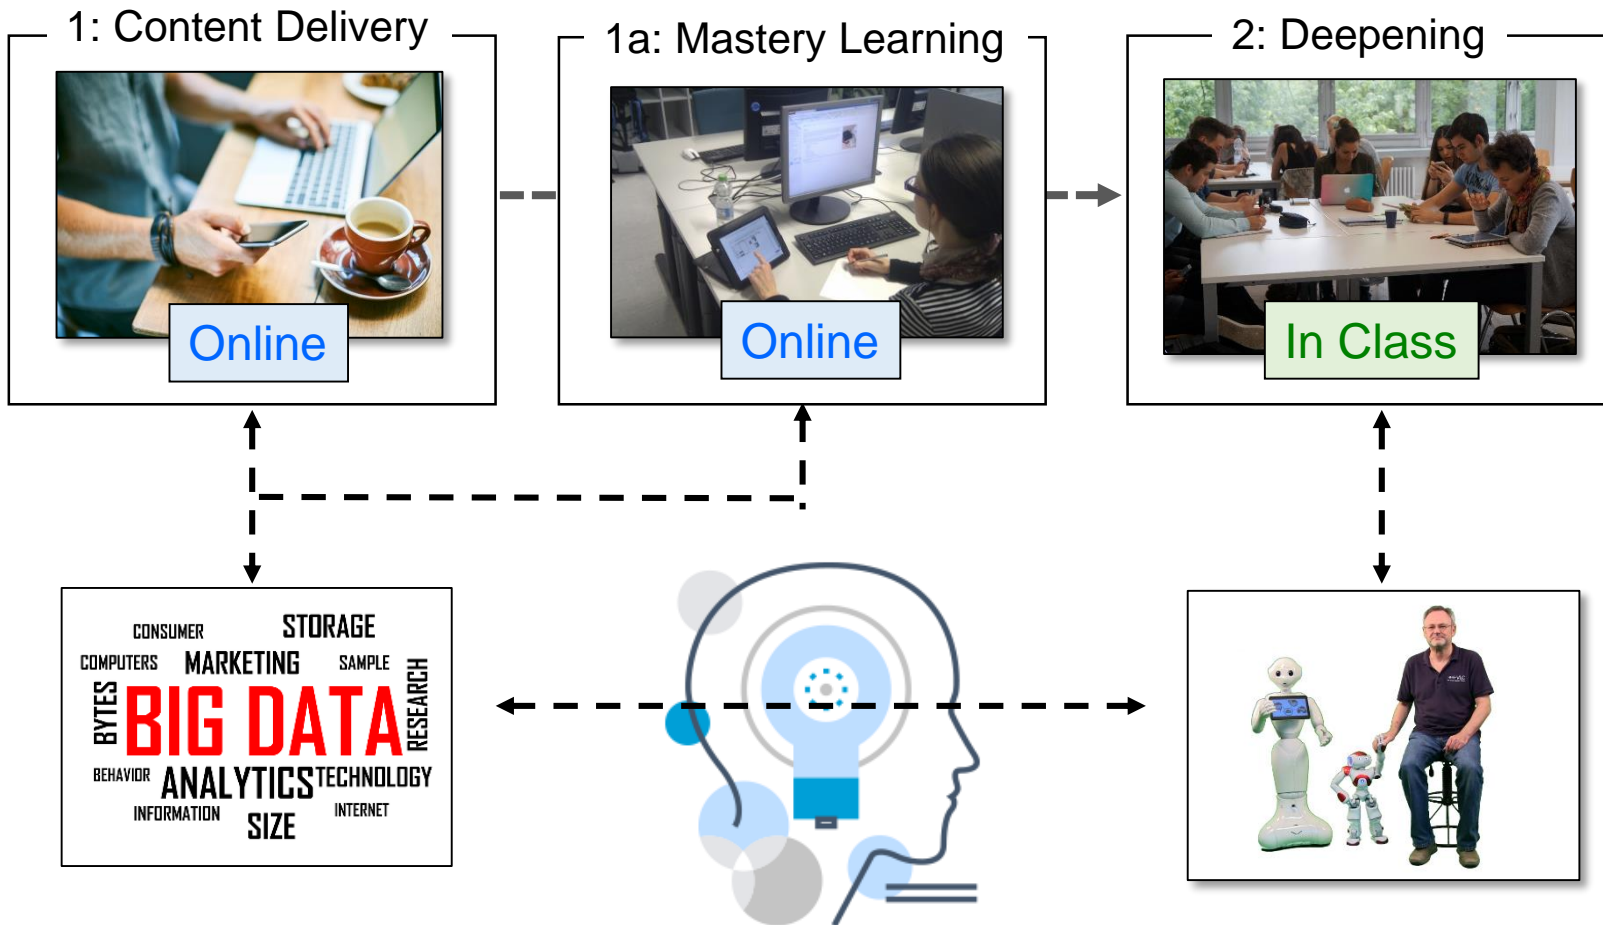

2: Deepening

In Class

COACHING

gain time for individual tutoring

didactic simplification

individualisation

2: Deepening

Online

4. Educational Robot Applications

How do robot applications work and what is their benefit?

The Quizmaster App

Goal:

The robot asks and presents questions, applies and controls the time, gives advice and presents the solutions.

The Student Advisor App

Goal:

Students contact the robot via their QR-Code in order to be helped on course-related and individual problems.

The MC App

Goal:

The robot serves as „Master of Ceremonies“ (MC). He introduces the class participants and asks for their motivation to take part in the class/workshop.

Robot Apps & Benefits

Robot Apps

Advisor

Quizmaster

MC

Naive Partnership

Benefits

Gain Time

Didactic Simplification

Individualisation

Usability

Classroom Packages

> 30 minutes

In Class Action

- Introduction
- Questions
- Task 1
- ...
- Task n
- Test
- Evaluation

Robot Apps

- MC
- Live-Voting
- Presenter
- Quizmaster
- Evaluation

Cumulative App Template

Template

+ *Data/Tasks*

=

Robot App 1, 2 ... n

Template

+ *Data/Tasks*

=

Robot App 1, 2 ... n

The new scenario

- Coaches fill the Template with „their“ data before an in-class meeting.

Template

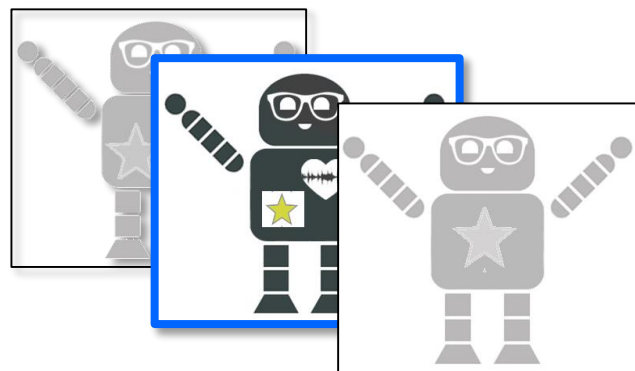

+

Data/Tasks

=

Robot App 1, 2 ... n

The new scenario

- Coaches fill the Template with „their“ data before an in-class meeting.
- In class, the robot takes over giving the coach the freedom for customized coaching.
